

# Model 380/381 Control Valves

## Technical Sales Bulletin

**Figure 1** Model 380 Control Valve with DFC Actuator

The Dyna-Flo 380 series of valves are heavy duty globe style control valves designed for high pressure applications. These valves are used in all kinds of demanding applications, including oil and gas production and chemical process.

Both Models 380 and 381 are cage guided control valves with balanced plugs. Model 380 control valves are capable of Class V shutoff at process temperatures below 450°F (232°C). Model 381 control valves are well suited for general applications that do not require tight shutoff.

380 Series control valves can be used in either snap on/off acting or throttling applications of either liquids or gasses. A bolted bonnet is standard and a typical actuator is a Dyna-Flo Model DFC or DFO linear actuator.

### Features

#### High Quality Construction

Dyna-Flo uses only materials that have been proven to provide superior, trouble free performance. All materials comply with ASME and ASTM specifications.

#### Versatility

A wide range of trim options including Low Noise and Anti-Cavitation make the 380 a highly versatile control valve.

#### Field Service Friendly

No special tools are required to change or inspect trim. Top access makes in-line service easy.

#### Industrial High Quality External Coatings

Our standard industrial high quality external coatings provide long lasting resistance to the harshest environments.

#### Pressure Drop Capabilities

The Model 380 can shut off against inlet pressure equal to ASME B16.34 rating.

#### Sour Gas Service Capability

The 380 Series can be constructed out of materials that comply with the recommendations of the National Association of Corrosion Engineers (NACE) MR-0175.

#### Shut Off Classification

Seat leakage options range from ANSI/FCI 70.2 and IEC 60534-4 Class II to Class V.

#### Emissions Reducing Packing

Help prevent the loss of process media and reduce packing maintenance with the use of Dyna-Flo's Live Loaded PTFE packing systems.

# Model 380/381 Control Valves

## Technical Sales Bulletin

### SPECIFICATIONS

#### Configurations

Refer to Table 1.

Consult your Dyna-Flo sales office for other available configurations.

#### Sizes and Connection Styles

Models: 380 & 381  
Size: 3" & 4"x3"  
Rating: ASME 2500  
Connections: RF / RTJ / BWE

#### Maximum Inlet Pressures and Temperatures

Consistent with ASME class rating as per ASME B16.34, unless limited by either material, pressure or temperature limitations. For pressure / temperature charts refer to Figure 8.

#### Maximum Pressure Drops

Same as maximum inlet pressure unless otherwise rated by specific trim construction.

#### Standard Seat Leakage Classifications

Refer to Table 1.

#### Dimensions

Valve Dimensions  
Refer to Tables 4 & 5.

Valve Dimensions  
Refer to Figure 2.

#### Approximate Valve Body Weights

Refer to Table 2.

#### Valve Body to Bonnet Bolting

Refer to Table 7.

#### Characteristics

- Equal Percentage (Standard)
- Modified Equal Percentage
- Linear

#### Flow Direction

- Model 380 - Flow Down
- Model 381 - Flow Down

#### Packing Type and Example

The standard packing is PTFE V-Ring. Live loaded low emission, graphite and other packing arrangements are also available. Refer to Figure 8.

#### Valve Sizing Coefficients

For standard coefficients at maximum travel, refer to Table 9. For full list of coefficients refer to document P-CVSM.

#### Valve Travel and Yoke Boss Sizes

Refer to Table 3.

#### Materials

Body and bonnet material options include:

LCC (A350-LF2 optional\* bonnet material)

WCC (A350-LF2 optional\* bonnet material)

CF8M (A182-F316 optional\* bonnet material)

**\*NOTE:** Dyna-Flo reserves the right to substitute a cast material with the forged bar equivalent in the event a casting is not available.

Refer to Figure 8. Refer to Tables 6 & 7 for typical construction materials. Refer to Table 8 for trim selections.

For more information and other options contact your Dyna-Flo sales office.
