

# DF400 SERIES

## Eccentric Rotary Plug Control Valve System

Half as large and half as heavy as standard globe valves of the same port size, the DF400 is ideal for demanding high temperature and severe service process control applications. The compact design makes installation and maintenance more convenient than traditional valve and actuator assemblies.

### Target Markets:

- Oil & Gas
- Petrochemical
- Power Generation
- General Industry

### Product Description

<b>Service:</b>	Liquid/Gas	<b>Characteristic:</b>	Linear
<b>Size Range:</b>	1 / 2 / 3 / 4 Inch	<b>Features:</b>	Powerful compact design
<b>Pressure Range:</b>	ASME 150 / 300		Easy maintenance and trim change
<b>Temperature Range:</b>	-320F to +750F		NACE Ready
<b>End Connections:</b>	RF		Standard low-emission packing
<b>Standard Materials:</b>	Body:	WCC or CF3M	
	Trim:	R30006 and S31600/S31603	
	Seals:	VITON or KALREZ®
